[1] Equal to known MFR subrelations
2) Ship Green* (100% / 50% / 25% alternative fuel allocation), delivering min. 84% / 42% / 21% well-to-wake CO_2e reduction versus VLSFO baseline
[3] 22/42/45GP; 22/42/45UP; 20/22 Tank; 22/42/45NOR; SOC
4) Ship Green* Fee includes credit for EU ETS which is part of sea freight

Ship Green is a service that can be added to a Hapag-Lloyd ocean shipment. Hapag-Lloyd uses certified alternative fuels for part of its fuel consumption within its network and allocates the associated emission reductions to booked Ship Green shipments through a Book & Claim approach. This does not necessarily mean that a specific shipment is physically transported on vessels using these alternative fuels. Ship Green* 25, 50 and 100 refer to the share of a shipment's energy allocated to certified alternative fuels, not to the percentage of emissions reduced. The numbers currently correspond to Well-to-Wake emission reductions of at least 21%, 42% and 84% compared with conventional transport using Very Low Sulphur Fuel Oil (VLSFO). Further information on the methodology and the fuels used is available at hapag-lloyd.com/ship-green.
