Status Indicators

Status Indicators (M and C) form part of the UN/EDIFACT standard and indicate a minimum requirement to fulfil the needs of the message structure.

The Status Indicators are:

Indicator	Value	Description
M	Mandatory	This entity must appear in all messages. Shown as usage indicator "M" in Implementation Guidelines.
C	Conditional	This entity is used by agreement between the parties to the transaction.

A 'Conditional' Status Indicator may be represented by a supporting Usage Indicator which is either M, O, D or X.

Usage Indicators

Throughout this document reference is made to indicators (M, D, O and X) which are shown adjacent to data items and which dictate for the particular message or set thereof the agreed usage of the data items or entities.

Set out below are the indicators and their respective uses:

Indicator	Value	Description
M	Mandatory	Indicates that this entity is mandatory and must be sent in this implementation.
O	Optional	Indicates that this entity is at the need or discretion of the sender of the message.
D	Dependent	Indicates that the use of the entity depends upon a well-defined condition or set of conditions. These conditions must be clearly specified in the relevant implementation guideline.
X	Not Used	Indicates that the entity is not to be used in this message implementation.

Please be aware that each usage indicator describes the usage of an entity within it's parent entity. For example, a segment that is marked to be (M)andatory within an optional segment group must only be sent when the segment group is used.

FTX+ACA++WL+WAVE BL'
FTX+PRF:MF+EORI MF123'
```

Tag	Element Name	Status	Type	Usage
4451	TEXT SUBJECT CODE QUALIFIER	M	an..3	M

Description:

Code qualifying the subject of the text.

Note:

BLC	Bill of lading / Sea waybill clause (printed on B/L)
AAE	UCR number / Uniform Consignment Reference
AAI	Bill of lading / Sea waybill remarks (not printed on B/L)
CCI	Customs clearance instructions
ACA	Electronic Bill of Lading provider
PRF	Purpose or Function of the additional parties involved in the transaction

"AAE" usage:

EU ICS2 relevant Customs Reference for Advanced Filing. Can be supplied by customer for all three scenarios: Straight BL, Carrier House BL, Customer Self Filer. The UCR (Unique Consignment Reference) is a reference number of consignments that is unique worldwide. Recommended by the World Customs Organization (WCO). The UCR is assigned to goods for entry, import, exit and export.

"CCI" usage:

The following rules apply:

1. United States or Canadian Imports:

When Port of Discharge is a US or Canadian port, Manifest Filer Status (MFS) and Manifest Filing Country are mandatory at header level:

Example:

FTX+CCI++MFS+5:US

or

FTX+CCI++MFS+1:US:SCAC

If Manifest Filer Status is Self (1), then Manifest Filer Identification C108, 4440(3) is mandatory.

2. FROB Cargo thru the US or Canada:

- For FROB cargo through the US, eg.- Hamburg -> US -> Santiago, Hapag-Lloyd recommends that customers provide Filer Status (Self or Carrier) for Manifest Filing Country = US
- For FROB cargo thru Canada, eg. Hamburg -> Montreal -> Boston, Hapag-Lloyd recommends that customers provide Filer Status (Self or Carrier) for Manifest Filing Country = CA.
- Filer status should NOT be provided for FROB cargo NOT involving US or CA.

3. ICS2:

If imports and transits go through EU, Northern Ireland, Norway or Switzerland, ENS (Entry Summary Declaration) is mandatory at header level. If the first element of FTX:C108:X4440 equals "1", it indicates outside filing (not by HL).

Additionally, if second element of FTX:C108_Text_Literal:X4440 is present and its value equals "HBL", partner indicates that there will be House Bills of Lading used by Self filer.

If the first element of FTX:C108:X4440 equals "5", it indicates carrier filing (by HL).

If using HBLs, the details should be included later in the message.

The partner can either provide their HBL references or send HL the data without references if they want HL to create the HBLs.

Examples:

```
FTX+CCI++ENS+1'
FTX+CCI++ENS+1: HBL'
FTX+CCI++ENS+5'
```

4. NAIC MPC I

Imports and transits going to or through United Arab Emirates require MPC I (Maritime

Preload Cargo Information) Party ID to be filed to NAIC (National Advance Information Center) for advanced customs clearance.

The parties responsible for filing:

Shipping lines: They must submit the details of the Carrier's Bill of Lading.

Freight forwarders and NVOCCs: They are liable for filing the House Bill of Lading data to NAIC, therefore their MPC I Party ID is required.

Example:

```
FTX+CCI++MPCI+1:AE:MPCI ID Value'
"MPCI" as qualifier [C107/4441]
"1" for self/third-party filing [C108/4440]
"AE" for UAE [C108/4440:4440]
MPCI ID as the unique identifier [C108/4440:4440:4440]
```

Hint: Hapag-Lloyd is not offering a filing service for Freight Forwarders/ NVOCCs in UAE

"ACA" Usage

The EBL providers where Hapag-Lloyd shall issue eBL.

Currently supported by Hapag-Lloyd:

```
IQAX: FTX+ACA++IQAX+IQAX
WaveBL: FTX+ACA++WAVE+WAVE BL
Galileo (by Bolero): FTX+ACA++BOLE+BOLERO
```

GID Goods Item Details

Status: M	Usage: M	Min/Max: 1/1
Group: 18		

up

Description:

To indicate totals of a goods item.

Note:

At least one GID segment has to be transmitted.

GID rules: At least the outer package (1st packing level) has to be sent. For hazardous cargo, the inner package (2nd packing level) may also be required. The inner-inner package (3rd packing level) may be provided, if there are multiple hazardous cargoes in the same inner package. 'PALLETS' must not be reported as package type but may be sent within the commodity description or as part of the package description.

In case of different inner- and inner-inner-packages within one outer package, the same GID sequential counter (1496_Goods_Item_Number) has to be used. For the outer package, the first composite C213 has to be used. For the inner package, the first composite C213 will be empty and the second composite C213 will be used.

PLEASE NOTE WITH REGARDS TO DG CARGO:

According to Mexico customs and, as from January 2011, also EU + US customs, the consolidation of several hazardous cargoes of different commodities respectively consolidating hazardous cargoes and non hazardous cargoes in one MTD cargo is not allowed. A manifest showing DG details per cargo is required.

THEREFORE DIFFERENT HAZARDOUS CARGOES OR HAZARDOUS AND NON HAZARDOUS CARGOES MUST NOT BE COMBINED IN THE SAME GROUP 18, not even in the initial booking request.

Example:

Outer package without inner package:
GID+1+20:CR::CRATE'

Outer package with one inner package (2nd packing level):
GID+1+20:CR::CRATE'
...
GID+1++50:CT::CARTONS'

NAD Name and Address

Status: M	Usage: O	Min/Max: 1/1
Group: 19		

up

Description:

To specify the name/address and their related function, either by C082 only and/or unstructured by C058 or structured by C080 thru 3207.

Note:

United States or Canada Imports:

a. If Filer status (0990FTX) is Carrier (5) for Manifest Filing Country US or CA , then name and address should be provided for the following parties:
OS Original Shipper
UC Ultimate Consignee

b. If Filer status is Self (1), Requestor should not provide name and address for OS and UC parties.

ICS2

If multiple Housebills are requested, EORI of the OS and UC parties should be provided in the G18:G19:NAD:C082:X3039 element.

"TO ORDER" shipments to be marked in NAD+UC.

The "TO ORDER" clause in a Bill of Lading (B/L) serves as an endorsement mechanism that makes the document negotiable. This means the cargo ownership can be transferred by endorsing (signing over) the B/L to another party. In container shipping, a "TO ORDER" B/L is typically issued in the name of a bank or shipper and requires endorsement (by signing the back of the document) to transfer ownership. It is commonly used in trade finance, particularly with Letters of Credit, as it provides security to sellers while allowing buyers to take possession of goods once payment terms are met.

In "To Order" shipments, Actual Notify Party is required. The EORI and Telephone number of the Actual Notify Party (NAD+N1) is also required.

Example:

NAD+OS+OS EORI+ORIGINAL SHIPPER NAME+OS ADDRESS:ADDRESS CONTINUED'
NAD+UC+UC EORI+Dummy Ultimate Consignee:444 Street:City:Region:67890:UC'

RFF Reference

Status: M	Usage: O	Min/Max: 1/1
Group: 22		

up

Description:

To specify a reference.

Note:

Customs regulation related remarks:

Brazil Exports:

- a. When Port of Load is a Brazilian port, the following should be provided for each commodity:

ABT NCM (Nomenclature Comun do Mercosul) commodity code
 ED Export Declaration Type
 ADU Customs House Broker Reference (also known as "Export
 Dispatch Declaration" or "DDE")

- b. One of the following three qualifiers should be provided for Export Declaration Type:

RFF+ED:DE - indicates Export Declaration Type = DE.
 RFF+ED:DSE - indicates Export Declaration Type = DSE.
 RFF+ED:PCI - indicates Export Declaration Type = PCI.

Brazil Imports:

When Port of Discharge is a Brazilian port, the following will be provided for each commodity:

ABT NCM (Nomenclature Comun do Mercosul) commodity code

United States Exports:

When Port of Load (0520LOC) is a US port, Internal Transaction Number (TN) should be provided either at the header or GID (for each commodity).

If TN is provided at the Header level, it should not be provided at the GID level and vice versa.

Requestor should not provide TN when the Port of Load is NOT a US port.

Example:

RFF+ON: PURCHASE ORDER NO'
 RFF+BH: HOUSE_BL_NUMBER
 RFF+AVY: DUMMYEORINUM2-99'
