

Sustainability-Linked Finance Progress Report

Hamburg, July 2022

In 2021, the AER of Hapag-Lloyd's owned fleet amounted for 7.08, which is below the SPT Trajectory of 7.25

COMMENT

- As part of the Sustainability-Linked Bond Framework we commit ourselves to reduce the CO₂ emission for our owned fleet by 60% until 2030 (compared to 2008)
- From 2018 onwards an annual Sustainability Performance Target ("SPT") Trajectory has been drawn which will result in achieving the 60% reduction target in 2030
- In 2021, the AER (Average Efficiency Ratio) of our owned fleet amounted for 7.08, which is below the SPT Trajectory of 7.25
- The calculation of the AER has been verified by external classification society DNV (pls. see separate confirmation)
- We confirm that for 2021 the respective IMO DCS Statements of Compliance for fuel oil consumption reporting have been issued for all vessels of our owned fleet
