

Hapag-Lloyd LIVE:

Smart Monitoring
for Your Cargo.

HAPAG-LLOYD
LIVE

Hapag-Lloyd aims to set a new standard of operational efficiency and service quality for our customers by creating the world's smartest reefer container fleet.

By offering remote monitoring solutions visualizing what happens inside our reefer containers during your refrigerated transport, we are committed to the highest level of transparency. We provide you with key data about temperature, humidity, O₂ and CO₂ from inside your reefer container. On top you can track its latest location in real-time.

Choose between **Hapag-Lloyd LIVE Basic** and **Hapag-Lloyd LIVE Plus** – our two tailor-made products to fit your individual needs.

Our Offer

- Intelligent monitoring technology and advanced products that transmit our live data directly to your screen
- Reliable, uncensored, near to real-time data updated every hour without additional delay
- All information at one glance
- Two tailor-made products with new features developed based on our customers' feedback
- Integrated data download in both Hapag-Lloyd LIVE Basic & Hapag-Lloyd LIVE Plus

Your Benefits

- Full transparency on all crucial data throughout the entire multimodal journey
- Easy access to the digital cold chain
- Convenient data download
- Trust in our operational performance while we are taking care of your cargo
- High security level due to easily trackable container locations
- Planning certainty based on profound knowledge to optimize your supply chain

Hapag-Lloyd LIVE Basic

Hapag-Lloyd LIVE Basic is the perfect monitoring tool for all perishable and sensitive goods demanding temperature control – be it pharmaceuticals, dairy, frozen fish or chocolate.

Hapag-Lloyd LIVE Plus

Hapag-Lloyd LIVE Plus is the advanced monitoring option for all commodities that need a controlled atmosphere and for all products requiring cold treatment.

Monitored data** – visible along your cold chain
