Ship Green:

The easy way to avoid emissions.

Ship Green is an additional service that gives you the opportunity to directly book a climate-friendly shipment online – no matter if it was placed via the Hapag-Lloyd Online Business Suite, EDI, iNTTRA or any other channel. Simply add **Ship Green** to your existing Hapag-Lloyd booking to actively avoid 25, 50 or 100% of the emissions on the ocean leg of your or your customer's container transport with Hapag-Lloyd.

For Ship Green, Hapag-Lloyd uses biodiesel. It's based on the Book and Claim approach, which means that Hapag-Lloyd attributes emissions avoidance to all its ocean leg services, regardless of the vessel and route used. Thus, Ship Green is available on all Hapag-Lloyd services and for all customers globally. It is currently available for the ocean leg of dry cargo and standard containers only – but it will be expanded in the future.

Your Benefits

Proactive Emissions Avoidance

Proactively and directly reduce your CO2e footprint by adding biodiesel to your or your customer's shipment.

Easy to Book Online

Easily avoid carbon emissions via the self-service in the Online Business Suite. Anytime, anywhere and with no long-term commitment required.

Three Options to Choose from

Freedom to choose between three different options tailored to your requirements – avoiding 25, 50 or 100% emissions.

Ship Green in Just a Few Steps

1. Place your booking with Hapag-Lloyd.

2. Choose one of the two ways below to purchase Ship Green.

   - Go to the Additional Services page in the Online Business Suite and click on **Ship Green.** Enter your booking number, agree to the Terms and Conditions, and click on "Purchase Ship Green".

   - Go to the Navigator in the Online Business Suite and select Ship Green for your confirmed shipment. Agree to the Terms and Conditions and click on "Purchase Ship Green".

3. Choose your option to avoid either 25, 50 or 100% of the emissions caused and confirm your purchase.
