

## Applicability Emergency Fuel Inland Surcharges (EFO/EFD) – Area Mexico

April 15<sup>th</sup>, 2026

Although the surcharge is officially effective as of **April 1st**, it is important to highlight that **this charge will only be applied when physically the inland transportation is performed, meaning from the moment the inland positioning/move takes place on or after April 1st** (terminal pick up for Imports and customer facility show up for Exports) **in Mexico**.

This implementation is driven by significant fuel cost increases recently imposed by our inland service vendors.

In summary:

- It **applies based on execution of the Inland move**, starting April 1st onwards.
- Any Inland transport performed before the 1st of April in Mexico is not subject to the surcharge

We want to ensure this is clearly understood to avoid any misinterpretations when communicating with customers and surcharge applied.
