

eBL: Goodbye Paper – Hello Digital!

Electronic Bills of Lading (eBLs) are digital versions of paper BLs that carry the same legal validity as their traditional counterparts while amplifying security, simplicity and efficiency. Compared to paper BLs, eBLs are much more convenient. Using eBLs enables quick exchange of shipping documents between all parties involved and thereby greatly reduces your transfer and handling times. Together with our certified partners, we are excited to equip you for the future of digital shipping documentation!

Your Benefits

Increased Efficiency

eBLs enable instant generation, access, and transfer of shipping documents, streamlining logistics and speeding up daily operations.

Unmatched Security

Thanks to secure blockchain technology, your documents are protected from fraud and forgery while carrying the same legal weight as paper BLs.

Saved Costs

Cut costs on printing, couriers, storage, and error correction, while also being more environmentally friendly than paper BLs.

The Perfect Partner Tailored to Your Needs

WaveBL

With our integration of WaveBL, you benefit from a blockchain-based platform that transforms traditional paper document handling into a seamless, electronic process. Catered to all business sizes, WaveBL simplifies operations with one click, reduces errors, and offers flexibility to release eBL to booking parties or freight forwarders.

IQAX

IQAX is a global IT company offering blockchain-powered solutions for the logistics ecosystem. Their eBL platform, managed by GSBN, enables tracking and managing eBLs alongside shipment milestones. Through our partnership, we deliver secure data exchange and seamless collaboration. Ideal for cost-sensitive businesses, IQAX empowers you to adapt to digital trade while optimizing your operational insights.
